Tutorial intro

Tutorial

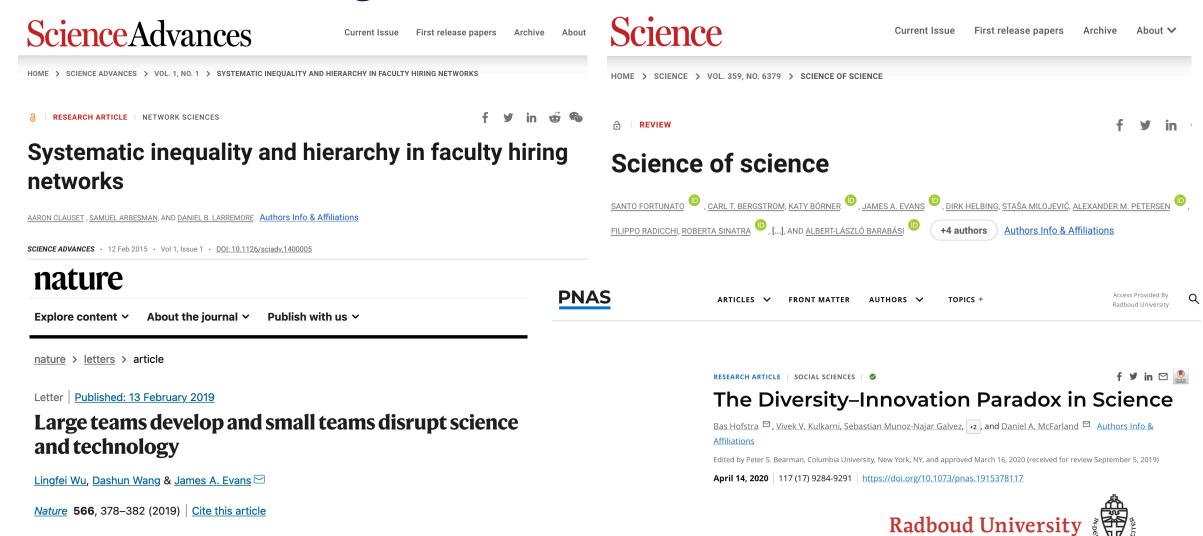

Why webscrape science data?

- Science is an inherently social enterprise
 - "Science" == co-evolution of social aspects and production
 - Social dynamics == collaboration, topic choices, academic job placements
 - I.e., "humans" in science
 - Production dynamics == publication, innovation, grants, patents
 - I.e., "knowledge" in science

Studied through "science data"

What is science data?

- ...all data related to science

What is science data?

- ...all data related to science

What are networks in science data?

- Many:
 - Co-author networks
 - Project networks
 - Faculty hiring networks
 - Migration networks
 - Citation networks
 - Semantic networks
 - And many more

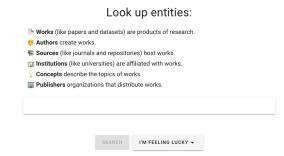

Sources: science data

Tutorial: departments & co-authors

 Which colleagues in academic departments co-author and why?

- Let's built a dataset from scratch to answer this Q!

- What do we need?
 - Departments?
 - Papers?
 - Co-authorships?
 - Matching?
